## Publishing Office

Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, England  
[Tel. Exeter (01392) 51558; Fax (01392) 425370].

Production Editor: Jacqueline Turner.

## Subscription and Advertising Offices

North America: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.  
Rest of the World: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England  
[Tel. Oxford (01865) 843000; Fax (01865) 843010].

## Subscription Rates

Annual Institutional Subscription Rates 1994: North, Central and South America, US\$815.00, Rest of the World £529.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

## Back Issues

Back issues of all previously published volumes, in both hard copy and in microform are available direct from Elsevier Science offices.

Published monthly except June and September. Copyright © 1994 Elsevier Science Ltd

Second class postage paid at RAHWAY, NJ. Postmaster send address corrections to *Computers & Operations Research*, c/o Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

## List of Contents

### NUMBER 1

<b>John W. Chinneck</b>	1	MINOS(IIS): infeasibility analysis using MINOS
<b>Noel A. Bryson and Saul I. Gass</b>	11	Solving discrete stochastic linear programs with simple recourse by the dualplex algorithm
<b>Frits C. R. Spijksma</b>	19	A branch-and-bound algorithm for the two- dimensional vector packing problem
<b>V. A. Barker and Bo Friis Nielsen</b>	27	Using program package NSPCG to analyze the trunk reservation service protection method
<b>Amiya K. Chakravarty and Sanjoy Ghose</b>	39	Strategic unijerproduction with product switching
<b>Joanna M. Lelono</b>	57	Adjustment process-based approach for computing a Nash-Cournot equilibrium
<b>Hyo-Seong Lee and Sang Kuk Kim</b>	67	Optimal dispatching of an infinite capacity shuttle with compound Poisson arrivals: control at a single terminal
<b>Ross A. Gerrard and Richard L. Church</b>	79	Analyzing tradeoffs between zonal constraints and accessibility in facility location
<b>Steven E. Butt and Tom M. Cavalier</b>	101	A heuristic for the multiple tour maximum collec- tion problem
<b>Announcements</b>	I	

### NUMBER 2

<b>Gen-Huey Chen and Yung-Chen Hung</b>	113	Algorithms for the constrained quickest path problem and the enumeration of quickest paths
<b>D. Ben-Arieh and P. T. Chang</b>	119	An extension to the $p$ -median group technology algorithm
<b>Shouhong Wang and Norman P. Archer</b>	127	A neural network technique in modeling multiple criteria multiple person decision making
<b>Shouhong Wang</b>	143	Neural network techniques for monotonic non- linear models
<b>P. L. Abad</b>	155	Supplier pricing when the buyer's annual require- ments are fixed
<b>S. Lipovetsky and A. Tishler</b>	169	Linear methods in multimode data analysis for decision making

**Evangelos Triantaphyllou,  
Allen L. Soyster and  
Soundar R. T. Kumara**

**185** Generating logical expressions from positive and negative examples via a branch-and-bound approach

**Pao-long Chang,  
Shiuh-nan Hwang and  
Chiang Kao**

**199** Some good multipliers for random number generator for 16-bit microcomputers

**Paulo M. França,  
Michel Gendreau,  
Gilbert Laporte and  
Felipe M. Müller**

**205** A composite heuristic for the identical parallel machine scheduling problem with minimum makespan objective

**E. A. Elsayed and  
Mohammed Ettouney**

**211** Perturbation analysis of linear programming problems with random parameters

**Announcements**

**1**

### **NUMBER 3**

**Lance A. Matheson,  
J. Pirie Hart and  
T. D. Klastorin**

**225** The optimal design of personalized bank check printing plates

**Bezalel Gavish and  
Suresh Sridhar**

**239**  $O(n)$  algorithms for load balancing in distributed computing systems

**Bill C. Hardgrave,  
Rick L. Wilson and  
Kent A. Walstrom**

**249** Predicting graduate student success: a comparison of neural networks and traditional techniques

**J. N. Hooker, H. Yan,  
I. E. Grossmann  
and R. Raman**

**265** Logic cuts for processing networks with fixed charges

**Marc J. Schniederjans  
and Karen D. Loch**

**281** An aid for strategic marketing in the banking industry: a Markov analysis

**Surendra M. Gupta and  
Emanuel Melachrinoudis**

**289** Complementarity and equivalence in finite source queueing models with spares

**Sushant Jain and  
J. MacGregor Smith**

**297** Open finite queueing networks with  $M/M/C/K$  parallel servers

**Han-Lin Li**

**319** A new global approach for 0-1 polynomial programs

**Adam Fadlalla, James R. Evans  
and Martin S. Levy**

**329** A greedy heuristic for the mean tardiness sequencing problem

**Gölgén Bengü and  
Juan Carlos Ortiz**

**337** Telecommunications systems maintenance

**Kao-Chêng Lin and  
Maw-Sheng Chern**

**353** The single most vital arc in the most economical path problem—a parametric analysis

#### NUMBER 4

- |  |     |   |
|--|-----|---|
| <b>Brian Borchers<br/>and John E. Mitchell</b>                       | 359 | An improved branch and bound algorithm for mixed integer nonlinear programs   |
| <b>Yong Sun Choi and<br/>Soung Hie Kim</b>                           | 369 | An improved multiple criteria visual interactive method with stepwise focused contouring of efficient criterion vectors |
| <b>Layek Abdel-Malek and<br/>Chi Tang</b>                            | 385 | A heuristic for cyclic stochastic sequencing of tasks on a drum-like storage system                                     |
| <b>T. Yamada, J. Yoruzuya<br/>and S. Kataoka</b>                     | 397 | Enumerating extreme points of a highly degenerate polytope  |
| <b>Tej S. Dhakar,<br/>Charles P. Schmidt and<br/>David M. Miller</b> | 411 | Base stock level determination for high cost low demand critical repairable spares                                      |
| <b>Kemal Altinkemer</b>  | 421 | Topological design of ring networks   |
| <b>Ami Arbel</b>   | 433 | A multiobjective interior primal-dual linear programming algorithm  |
| <b>Yuemin Ding, Alok Baveja<br/>and Rajan Batta</b>                  | 447 | Implementing Larson and Sadiq's location model in a geographic information system                                       |
| <b>Stephen M. Hart and<br/>Chuen-Lung S. Chen</b>                    | 455 | Simulated annealing and the mapping problem: a computational study  |
| <b>Hong-Chieh Chou and<br/>Chung-Ping Chung</b>                      | 463 | Optimal multiprocessor task scheduling using dominance and equivalence relations  |

#### NUMBER 5

- |  |     |   |
|--|-----|---|
| <b>V. Sridharan and<br/>R. Lawrence LaForge</b>                          | 477 | A model to estimate service levels when a portion of the master production schedule is frozen |
| <b>Ahmet Bolat,<br/>Mehmet Savsar and<br/>Mohammed A. Al-Fawzan</b>      | 487 | Algorithms for real-time scheduling of jobs on mixed model assembly lines                     |
| <b>X. Cai and C. J. Goh</b>  | 499 | A fast heuristic for the train scheduling problem   |
| <b>Jianzhong Zhang and<br/>Dan Sha</b>                                   | 511 | A priority measure in interval methods for constrained global optimization                    |
| <b>Jeffrey L. Riggs,<br/>Sheila B. Brown and<br/>Robert P. Trueblood</b> | 521 | Integration of technical, cost, and schedule risks in project management                      |
| <b>William Hurley</b>  | 535 | Adjacent vertex simplex algorithms: more experimental results on random problems              |

<b>Zilla Sinuany-Stern, Abraham Mehrez and Arieh Barboy</b>	543 Academic departments efficiency via DEA
<b>Oded Berman and Zvi Ganz</b>	557 The capacity expansion problem in the service industry
<b>Katherine J. Toussaint and Bruce L. Golden</b>	573 Exchange heuristics to improve the clarity of base/time plots
<b>Joaquim J. Júdice and Fernanda M. Pires</b>	587 A block principal pivoting algorithm for large-scale strictly monotone linear complementarity problems
<b>Announcements</b>	I

#### NUMBER 6

<b>U. C. Gupta and T. S. S. Srinivas Rao</b>	597 A recursive method to compute the steady state probabilities of the machine interference model: $(M/G/1)/K$
<b>William E. Stein and Murray J. Côté</b>	607 Scheduling arrivals to a queue
<b>N. K. Jaiswal and B. S. Nagabhushana</b>	615 Combat modeling with spatial effects, reserve deployment and termination decision rules
<b>Stuart L. Harshbarger and Vladimir A. Greenberg</b>	629 Utility least cost planning and the Washington gas integrated model
<b>Wen Lea Pearn and Mao Lin Li</b>	641 Algorithms for the Windy Postman Problem
<b>Gur Mosheiov</b>	653 Scheduling jobs under simple linear deterioration
<b>Hamidreza Amindavar, James A. Ritcey and Arun K. Somani</b>	661 Analytical computation of Markov chain using Padé approximations
<b>John J. Bernardo and Kun-Si Lin</b>	677 An interactive procedure for bi-criteria production scheduling
<b>F. Harche and G. L. Thompson</b>	689 The column subtraction algorithm: an exact method for solving weighted set covering, packing and partitioning problems
<b>Abraham P. Punnen</b>	707 On combined minmax-minsum optimization
<b>Announcements</b>	I

#### NUMBER 7

<b>T. C. E. Cheng, Z.-L. Chen and C. Oguz</b>	717 One-machine batching and sequencing of multiple-type items
---	--

<b>Francis J. Nourie and Faruk Güder</b>	723	A restricted-entry method for a transportation problem with piecewise-linear concave costs
<b>Robert C. Soltysik and Paul R. Yarnold</b>	735	The Warmack-Gonzalez algorithm for linear two-category multivariable optimal discriminant analysis
<b>Yaw O. Chang and John K. Karlof</b>	747	Large scale geometric programming: an application in coding theory
<b>Steven T. Breslawski and Stanley Zionts</b>	757	A simulation based study of modifications to the Zionts-Wallenius algorithm for multiple objective linear programming
<b>C. S. Sung and B. K. Yoo</b>	769	Parametric max flow problems in a class of networks with series-parallel structure
<b>Kurt M. Bretthauer and A. Victor Cabot</b>	777	A composite branch and bound, cutting plane algorithm for concave minimization over a polyhedron
<b>B. V. Cadambi</b>	787	One machine scheduling to minimize expected mean tardiness—Part II
<b>Announcements</b>	I	

## NUMBER 8

### *HEURISTIC, GENETIC AND TABU SEARCH*

<b>Samuel J. Raff</b>	797	Preface
<b>S. Selcuk Erenguc and Hasan Pirkul</b>	799	Foreword
<b>Fred Glover</b>	801	Optimization by ghost image processes in neural networks
<b>David L. Woodruff</b>	823	Simulated annealing and tabu search: lessons from a line search
<b>Oya Icmeli and S. Selcuk Erenguc</b>	841	A tabu search procedure for the resource constrained project scheduling problem with discounted cash flows
<b>Jadranka Skorin-Kapov</b>	855	Extensions of a tabu search adaptation to the Quadratic Assignment Problem
<b>John Knox</b>	867	Tabu search performance on the symmetric traveling salesman problem
<b>Roland Hübscher and Fred Glover</b>	877	Applying tabu search with influential diversification to multiprocessor scheduling

<b>James P. Kelly, Manuel Laguna and Fred Glover</b>	885	A study of diversification strategies for the quadratic assignment problem
<b>Hasan Pirkul and Erik Rolland</b>	895	New heuristic solution procedures for the uniform graph partitioning problem: extensions and evaluation
<b>Haldun Aytug, Gary J. Koehler and Jane L. Snowdon</b>	909	Genetic learning of dynamic scheduling within a simulation environment
<b>Anna-Lena Nordström and Sullyman Tufekci</b>	927	A genetic algorithm for the talent scheduling problem
<b>S. Yeralan and C.-S. Lin</b>	941	Genetic search with dynamic operating disciplines
<b>Daniel G. Conway and M. A. Venkataramanan</b>	955	Genetic search and the dynamic facility layout problem

#### NUMBER 9

<b>Clark Jeffries and Tim Niznik</b>	961	Easing the conscience of the guilty net
<b>I. M. Premachandra and Liliana Gonzalez</b>	969	An exact solution to a class of queueing systems with multipurpose counters
<b>C. E. Love and K. F. Lam</b>	979	Classifying and controlling errors in forecasting using multiple criteria goal programming
<b>Jun Wang</b>	991	A neural network approach to modeling fuzzy preference relations for multiple criteria decision making
<b>Stephen E. Bechtold* and Michael J. Brusco</b>	1001	A microcomputer-based heuristic for tour scheduling of a mixed workforce
<b>Won J. Lee, A. Victor Cabot and M. A. Venkataramanan</b>	1011	A branch and bound algorithm for solving separable convex integer programming problems
<b>Bruno-Laurent Garcia, Jean-Yves Potvin and Jean-Marc Rousseau</b>	1025	A parallel implementation of the Tabu search heuristic for vehicle routing problems with time window constraints
<i>Technical Note</i>		
<b>Chiang Kao and J. Y. Wong</b>	1035	Several extensively tested random number generators

#### Announcements

I

#### NUMBER 10

<b>Weizhen Mao and Rex K. Kincaid</b>	1041	A look-ahead heuristic for scheduling jobs with release dates on a single machine
---	------	---

<b>Norman D. Curet</b>	1051	An incremental primal-dual method for generalized networks
<b>Ely Merzbach and Boris Singer</b>	1061	How to construct a partition when preference sets are given
<b>L. G. Proll and A. Salhi</b>	1069	A note on a maximum distance problem
<b>Cheryl Gaimon and Johnny C. Ho</b>	1073	Uncertainty and the acquisition of capacity: a competitive analysis
<b>Chiang Kao</b>	1089	Decomposition with simulated division for efficiently generating random numbers
<b>Ching-Jong Liao</b>	1095	A new node selection strategy in the branch-and-bound procedure
<b>Erhan Erkut, Yılmaz Ülküsal and Oktay Yeniçerioğlu</b>	1103	A comparison of $p$ -dispersion heuristics
<b>John R. Gum and James A. Chisman</b>	1115	An Operations Research Information System (ORIS)
<b>Announcements</b>	I
